## Grades 6–12

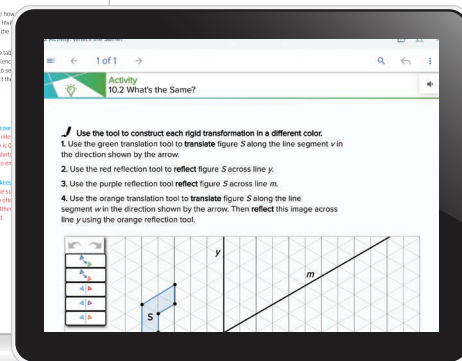

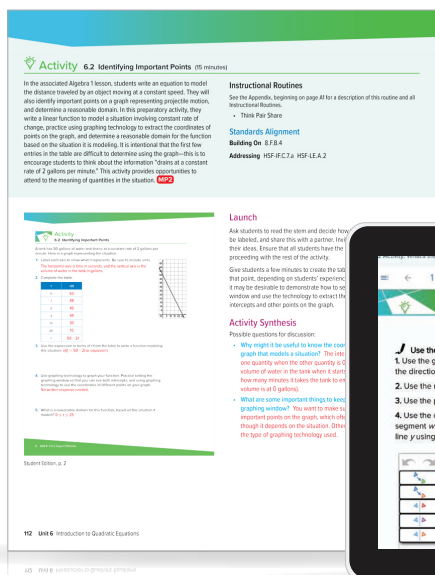

Decades of research shows that if students are given a chance to notice and wonder while trying to solve a problem by themselves, they retain procedural skills, develop problem-solving skills, build conceptual understanding, and form a mental framework for how ideas fit together. This allows students to develop strategies for tackling non-routine problems while engaging in productive struggle.

### EXCLUSIVE FEATURES

- Engaging color print resources for teachers and students
- Improved layout of teacher materials
- Efficiency in instructional support

### EXCLUSIVE DIGITAL FEATURES

- Interactive reports to drive instruction
- Fully digital student activities

for Grades 9–12 and Higher Education

## AN ADAPTIVE MATH AND SCIENCE PROGRAM

### Grades 3–12

ALEKS® (Assessment and Learning in Knowledge Spaces) is a web-based, artificially intelligent assessment and learning system for grades 3–12. ALEKS® uses adaptive questioning to quickly and accurately determine exactly what topics a student knows and doesn't know in a course. ALEKS® then instructs each student on the topics they are most ready to learn.

ALEKS® is purposefully designed to help educators:

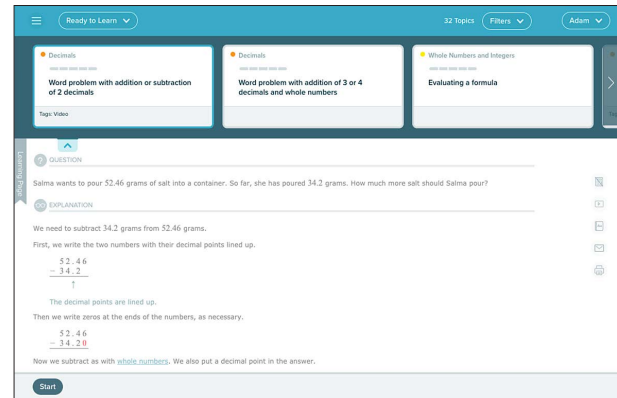

- Identify instructional gaps
- Personalize learning paths
- Track the progress of student learning and mastery

As a student works through a course, ALEKS® periodically reassesses the student's knowledge to ensure that topics learned are also retained. It's an approach that has proven to create math confidence and measurable success for over 20 years.

ALEKS® courses align with state and national standards, making it a perfect complement to any classroom environment. The proven technology of ALEKS® can integrate with any system, anywhere, on any device.

To date, this unique assessment and learning system has helped more than 20 million students at thousands of K–12 schools, colleges, and universities throughout the world

# Learning's Not a Destination, It's a Journey

## Rise™ | Grades K–8 Mathematics and ELA

Learning in today's environment can be a challenge for teachers and students. Whether it's virtual, in a brick-and-mortar building, or a combination of the two, changes to today's learning environment can impact each student's learning journey in different ways. But long-term lost learning doesn't have to be one of the consequences.

### Rise

- Identifies each student's learning gaps.
- Creates a unique learning sequence and pace for each student.
- Covers over 500 key grade K–8 learning objectives for math and ELA.
- Reinforces topics and mastery with the Recharge feature.
- Provides free offline access through the *ReadAnywhere*® app.

### How It Works

*Rise* is curated from McGraw Hill's proven content and is uniquely designed to ensure that students aren't revisiting lessons they've covered in other programs. Teacher assignments can focus on filling student's learning gaps while also reinforcing the topic mastery of students who are performing at grade level. Each grade-level objective presents the student with mini-cycles of questions to assess their learning progress. When students demonstrate they've learned an objective, they move on. Students who need more practice with a concept receive prescribed guided interactive reteaching activities to reinforce their learning.

## Powerful Reporting that Makes a Difference

Rise gives teachers and students the data and information they need to measure progress and engage with content to ensure mastery.

**Students** are able to architect their own learning path through prescribed support resources, a self-study Recharge feature, and through a customized student reporting dashboard that allows students to view their performance summary and the objectives where they need reinforcement.

**Teachers** access a progress monitoring dashboard to identify students at risk or behind grade level, and to review the concepts and topics each student needs to master. Metacognition of students' confidence, overall class performance, and specific student's performance on assignments provides teachers with in-depth progress monitoring and real-time content mastery feedback.

## How Do I Integrate Rise with My School District?

Rise is available through the McGraw Hill single-sign on and is powered by an adaptive learning engine. Upon purchase you'll also receive access to the free *ReadAnywhere*® app that allows for offline access.
